

GAME-CHANGING PROCEDURES
IN STROKE MANAGEMENT:

Maximizing the Effectiveness of Endovascular Treatment

Earn up to 1.00 AMA PRA Category 1 Credit™

FACULTY CO-CHAIRS

Opeolu Adeoye, MD, MS, FACEP, FAHA

Associate Professor
Co-Director, UC Stroke Team
University of Cincinnati
Cincinnati, OH

Andrew W. Asimos, MD

Medical Director, Neurological Emergencies
Neurosciences Institute
Carolinas HealthCare System
Professor, Department of Emergency
Medicine
Carolinas Medical Center
Charlotte, NC

Nurse Planner

Darby L. Copeland, EdD, RN, NRP, NCEE

Executive Director
West Virginia College of Emergency Physicians
Roanoke, WV

Mark Your Calendars

Date:

November 2, 2016

Time:

11:00 am - 12:00 pm

Location:

Conference Center at
Seattle Tacoma
International Airport
INSIDE Sea-Tac Airport

Presenting Faculty:

Stephen H. Anderson,
MD, FACEP
Attending Physician, ED
Auburn Regional Medical
Center/ MultiCare Auburn
Medical Center
Auburn, WA

Resources

Educational Need

Due to their broad scope of practice, staying well informed about the latest medical literature and the varied medical issues that present to the emergency department is difficult for emergency clinicians. Providing the latest evidence-based education in the diagnosis and treatment of stroke is key to changing practice patterns and improving patient care. The time-sensitive nature of stroke demands early intervention and confidence in assessment and treatment by the emergency physician. Providing decision-making tools that assist in the risk-benefit assessment when evaluating and treating stroke will assist in identifying patients eligible to receive t-PA and result in earlier interventions and treatment. Emergency physicians must be competent in clinical recognition, rapid initial management, and specialist consultation early in the diagnostic and treatment process.

Intended Audience

Emergency medicine physicians and other healthcare providers who manage stroke patients in the acute setting

Learning Objectives

After participating in this session, learners should be better able to:

- **Interpret** the latest clinical trial data evaluating endovascular therapy in the management of acute ischemic stroke and how this data applies to current practice
- **Implement** evidence-based care consistent with American Heart Association (AHA) and other pertinent guidelines
- **Develop** regional systems of care to optimize pre-hospital, between-hospital, and in-hospital workflows to improve patient outcomes

Accreditation Statement

The American College of Emergency Physicians (ACEP) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

This continuing nursing education activity was approved by the Emergency Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

Designation Statement

The American College of Emergency Physicians designates this live activity for a maximum of 1.00 AMA PRA Category 1 Credit™.

This activity is approved by the American College of Emergency Physicians for a maximum of 1.00 hour of ACEP Category I credit.

This program is approved for 1.0 contact hours of continuing nursing education.

Conflict of Interest Disclosure Policy

In accordance with the ACCME Standards for Commercial Support, ACEP requires that individuals in a position to control the content of an educational activity disclose all relevant financial relationships with any commercial interest. ACEP resolves all conflicts of interest to ensure independence, objectivity, balance, and scientific rigor in all its educational programs. All relevant financial relationships shall be disclosed to participants prior to the start of the activity.

Furthermore, ACEP seeks to verify that all scientific research referred to, reported, or used in a continuing medical education (CME) activity conforms to the generally accepted standards of experimental design, data collection, and analysis. ACEP is committed to providing its learners with high-quality CME activities that promote improvements in healthcare and not those of a commercial interest.
